INTRODUCTION

SPRING/ SUMMER 2025

The new Spring/Summer 2025 collection from Trespass includes a range of stylish yet practical outdoor wear. Envisioned by our design team, each product has been developed from initial drawings to fully-tested performance pieces; utilising specially developed Trespass technology.

Various fabric capabilities enable the designers to create an impressive range of products from quick-drying active wear to waterproof trousers and jackets. This includes Airtrap performance fleece which promotes a regular warm temperature, Duoskin fabric which draws moisture away from the skin, and Tres-tex & Tres-shield materials – both waterproof and with taped seams to ensure water is repelled even in-between panels.

The full complement of SS25 Trespass has been designed to encourage people to get out and explore the outdoors - and not letting rain, wind or any kind of adverse weather stop them. As well as clothing and footwear there are tents, sleeping bags and camping equipment also included; enabling customers to purchase everything they need from Trespass.

TECHNOLOGY GUIDE

AIRTRAP®

Designed for comfort and warmth an anti-pilling fleece, that is a versatile mid-layer. The structure of Airtrap® not only stretches to give you freedom of movement but creates airspaces that trap and hold your body heat while letting water vapour to pass freely. Also available, **AIRTRAP® ECO** utilising recycled materials.

ANTIBACTERIAL

A range of garments including active wear, baselayers and socks have antibacterial treatments, or like merino has natural antibacterial properties. These garments are great for travel. They can be worn multiple times before needing washed. The bacteria that cause bad odours are kept at bay.

COLDHEAT®

Lightweight padded insulation in our jackets that is durable with soft lofted fibres that trap and hold the heat generated by your body allowing you to stay comfortable in freezing conditions. Also available, **COLDHEAT® ECO** utilising recycled materials.

COOLMAX®

Coolmax® is a third party fabric offering soft, lightweight and breathable comfort. It wicks moisture away from your body keeping you cool, dry and comfortable.

DOWN

Our natural down provides the best in warmth to weight ratio. Fill power is a number indicating the relative quality of down. Higher fill power numbers indicate greater loft and insulating efficiency. A higher ratio of down to feather is also better.

DUOSKIN

Quick drying wicking fabric from Trespass® effectively draws moisture away from the skin. Tightly woven fibres draw moisture via capillary action where it quickly evaporates from the surface of the fabric, leaving you feeling dryer and more comfortable. **DUOSKIN+** brings additional **U.V. Protection**.

DWR

DWR is a **durable water repellent** finish to the fabric which helps shed water droplets from the outer face of the garment. DWR is not fully waterproof, but does reduce any wetting out of the garment. It can be washed out over time, but refreshed with the use of re-proofer like Nikwax or Grangers etc.

INTELLIGENT®

An inspired solution to the cold weather problem. Reflective surfaces send back valuable warmth that would otherwise escape. By reflecting the body's heat, intelligent use of materials can reduce bulk and padding with insulated outerwear.

MERINO WOOL

Merino wool is a naturally wicking fibre, moving moisture from the skin and transporting it through the material where it will evaporate, keeping your skin dry in hot temperatures and insulated in the cold. It is also highly breathable and has antibacterial properties, making it resistant to odour. Sometimes we blend the fibres with synthetics to improve durability.

MOSKITOPHOBIA®

This insect repellent treatment provides a major line in defence against irritating, biting insects. Used on a range of materials, Moskitophobia® is ideal for travel abroad as well as at home.

PACKAWAY

Be prepared without sacrificing weight and space in your pack. Packaway garments are lightweight and less bulky yet retain a great level of performance.

RECCO®

The RECCO® Rescue System is two-part technology. Ski resorts and rescue teams around the world carry RECCO® detectors. The detector sends out a directional search signal, which is echoed by RECCO® reflectors built into our products worn by skiers, riders and other outdoor people.

SOFTSHELL

Softshell has an athletic form supported by stretch qualities that allow for a full range of body movements. It is soft to touch, flexible and very comfortable. Softshell is suited to highly energetic pursuits. Moisture moves freely from your body to the outer environment, the high levels of breathability also improve drying times significantly making it comfortable over a wide range of weather conditions.

TAPED SEAMS

Every seam produced creates hundreds of needle holes that water can get through. Applying a thermoplastic tape under heat and pressure will seal the seams to keep moisture from passing through. Taped seams keep you drier and warmer.

INTELLIGENT®

TRES-SHIELD

Waterproof and Windproof Fabric - This performance fabric is used to produce a range of great value outerwear. Ideal for bad weather situations. Supple and durable, functional coatings and surface treatments help repel water and wind keeping you comfortable.

TRES-TEX®

Waterproof, Windproof and Breathable Fabric - This performance fabric is used in many of our ranges. Ideal for active, highly mobile pursuits. Supple, durable and functional coatings and surface treatments help repel water and work with your layering system to draw moisture away from your body. Available in multiple variants, coatings, membranes & stretch.

UV

Specially woven fibres shield the skin underneath from the sun's ultraviolet rays, providing an added layer of protection from the elements.

WATER REPELLENT ZIPS

Specially developed zippers that are designed to keep the water out thanks to a plasticised coating that overlaps the sides and teeth of the zip. This also means we can do away with excess material used in flaps and covers which, in turn, leads to a more streamlined, lightweight garment.

OUR RATINGS EXPLAINED

TP Ratings

Our quick reference guide helps you find the right level of performance to meet your needs.

A higher TP rating means more features and greater 'Technical Performance'.

See individual hang-tags & labelling for further details.

AT Ratings

The higher the rating the heavier the weight of fleece. We make finding the Airtrap® fleece that's right for you easy, with our AT rating system.

We offer a comprehensive range including Micro, Polar, Bonded, Water Resistant and printed garments with optimum comfort and protection in mind.

Sleeve & shoulder (garment)	47cm 18.5"	49.5cm 19.5"	56cm 22"	61cm 24"	65cm 25.5"	71cm 28"

Garments may vary in size specification depending on the style and ease allowance but will still fit the body size indicated.

Age is just an approximation of size. The height of the child gives a much better indication of which size to buy.
